

COMPANY DIRECTORY

Aislabin S.L.

Activities:

4329 - Other services at building sites.

Description of their activities:

- Thermal and acoustic insulation material supply and installation: mineral woods, expanded polystyrene, extruded polystyrene foam and polyurethane.?
- We sell CLIMAVER ventilation conducts and ISOVER ceiling voids.?
- Ceiling voids, conducts and façade finish installation.?
- Advice on possible solutions and law in force.

Material Resources:

- 4 on-site mobile units to spray polyurethane liquid foam. (each of them, consisting in a van and a projection machine).
- Vans for insulation material supplies.
- 2 teams: 2 workers per team, for insulation installation.
- Our premises and Industrial bay occupy 1000 m², for insulation material storage, management tasks and customer service.
- Data collection: for quality certifications of each job performed by our 4 units, we use PDAs (palmtop computers) to transfer data directly to our quality-management specific software.
- Our own laboratory: for monitoring material density.

Human Resources:

Number of Employees: 8

Training and educational background of our staff:

- 4 skilled employees are in charge of spraying liquid polyurethane foam on site. Every employee has completed specific training according to the proper performance of their activities.
- 1 sales representative, educated and trained to manage the sales and quality-control departments.
- 1 director, educated and devoted to managing the accounting, production, and sales departments.
- 2 apprentices, currently training on-the-job.

We also work with engineers employed by different National Associations we belong to, such as ATEPA (Technical Association of Applied Polyurethane), an association of which we are members of the Board of Directors, IPUR (Rigid Polyurethane Industry Association), ANDIMA (Insulating Materials National Association), as well as with engineers employed by ISOVER and EMPOLIME. Good knowledge of the national market allows us to expand our capacity to work, without problems.

Year of establishment: 1979

Future projects:

Currently, we are expanding our services to include the installation of insulation. At the same time, we are launching a patented new product aimed at the garden industry.

Main clients:

- Acciona
- Coca-Cola
- Copcisa
- Dragados
- El Corte Inglés

Electricidad Ibar

Activities:

4321.- On-Site Electrical Installation

Description of their activities:

- We work for almost any sector, such as residential construction, domotics, telecommunications, industry, security, access control, solar power, low consumption electrical heating... We are always ready to get adapted to new requirements and to specific projects for individual customers, such as TDT installation and adaptation.
- Telecommunication installation: computer networks, fiber optic, TV aerials, radio, satellite dish, WIFI...
- On-site heating and air conditioning installation (restaurants, kindergartens, pubs...)

Material Resources:

Equipment and materials for everyday activities and services:

- Owned equipment: HAULOTTE diesel and telescopic Lift platform 12mts.
- Vehicle Fleet: 10 commercial vehicles

Tools:

- 1 KOBAN KMI-2092 Power harmonics Analyser
- 4 PROMAX tv and satellite level meters
- 1 FITESI S177A Fiber optic Fusion Splicer
- OTDR fiber optic singlemode EXO AXS-110 Reflectometer.
- OTDT fiber optic multi-mode FLUKE Optifiber Reflectometer
- Fiber Optic Labelling
- Fiber optic microscope

Human Resources:

Number of employees: 15 ?

B. S. in Engineering: 1?

Management and administration: 2?

Fitters: 12

Year of establishment: 1997

Turnover:

- Year 2008: 881.600,00 €
- Year 2007: 1.227.851,00 €

Main projects:

- Aguas del Run SA bottling plant, Dam Group: 1500k VA power
- CCTV installation tasks at Civil Guard Facilities all around the country.
- Electrical maintenance of the ski resort in Benasque.
- Electrical panelboards installation tasks along the border fence in Melilla.
- Fiber Optic fusion tasks in Motorland (Teruel)
- Fiber Optic installation tasks at high level security venues.
- Fiber Optic installation tasks at the air base in Torrejón de Ardoz.
- On-site electrical and telecommunication installation at residential buildings.
- On-site installation at industrial bays, commercial premises.

Electrobin, S.A.U.

Activities:

4321 - On-site Installation: Electricity, plumbing, gas, air conditioning, fire control systems, ventilation systems, telecommunications, Endesa Support Service

Description of their activities:

- Everything concerning electrical installation, both for new building construction and specific projects. Our long experience with building constructors guarantees total security for your new project. We offer:
- Low- and medium-voltage cable installation.
- Electrical installation and industrial staging.
- Aerial and underground cable installation.
- Air conditioning installation.
- Firefighting
- Ventilation

Some types of installation require automated appliances able to face specific problems, therefore, we offer:

- Domotics installations.
- Electrical panelboards.
- Electrical panelboards and automation.
- PLCs with sensors and arrangements

We install the latest telecommunications and information transmission devices.

- Telecommunications (RF / GSM-GPRS / UMTS)
- Cable Data Networks (twisted pair / fiber optic)
- Wireless Data Networks (WIFI / WIMAX)
- Computer infrastructures.
- Fixed and mobile telephony installation. Switchboards

Gas installation

- On-site installation
- Maintenance and repair of individual channelized natural gas installations.

Endesa Support Service

- Gas and Electricity Customer Service
- Maintenance and repair of individual channelized natural gas installations.

- Technical support (meter installation, exchange and removal, power cuts, reconnections).
- Maintenance and repair of air conditioning installations.

Material Resources:

- Prolink tv and satellite level meters
- Helia HL-135002S Crane
- Still R-9 electric forklift

Metaga

Activities:

(2811)- Metal Structures and Components Manufacturing.

Description of their activities:

Metaga is devoted to two different activities, totally developed within our facilities, from design to manufacturing and assembly:

Metal Structure Manufacturing long experience in metal works for residential buildings, industrial bays, sport facilities, gangways, platforms, specific structures, etc.

Machinery manufacturing for 24-hour operation processing plants such as ceramic industry, fodder and dehydration plants, recycling plants, aggregate, fertilizers, electrical wire manufacturers, juice processing plants, etc.

Material Resources:

Metaga's facilities are spread over 16500 m², of which 7000 m² are devoted to manufacturing facilities and 800 m² to premises and warehouse.?

Metaga's main value derives from the availability of every necessary piece of equipment within our facilities in order to develop our work:

- 3 bridge cranes for loads from 3 Tn. up to 16 Tn.
- Automatic plasma cutting system for metal sheet from 0.8 mm. up to 60 mm.
- Benders for metal sheet up to 6 m. long.
- Rollers for metal sheet up to 20 mm. thick.
- Saws for cutting beams up to 700 mm.
- Punching machines for holes Ø40x20 mm. and Ø100x8 mm
- Crane trucks for assembly up to 25 m. high.
- Elevator platforms for working up to 18 m. high.

Human Resources:

- Number of Employees: 25
- Engineers: 3
- Management and administration: 1
- Manufacturing experts: 16
- Lathe operator: 1
- Truck drivers and crane operators: 2
- Apprentices: 2

Carretera N. 240 , km 137,5 - 22400 - Monzón (Huesca) SPAIN

Proyectos y tecnología sellen, S.L.

Activities:

(2562)- Mechanic engineering on behalf of third parties.

(2651)- Manufacturing of devices and instruments for measurement, authentication and navigation

Description of their activities:

Proytecса develops and manufactures all its mechanical and electronic devices:

EOD Robot AUNAV and **SUPERAUNAV**.

Access control devices:

- Access Entrance Gates
- SPI and SPA intelligent/automatic doors
- Epsilon automatic Lock-out chambers
- Walk-through metal detector arches

Unmanned Aeronautical Vehicles (UAV) Atmos 2**Tridimensional fence** (Melilla) border control.

Proytec fence for specific protection areas along the AVE railway **Sallen FIRE**. Currently, we have just developed a firefighting retardant product which is eco-friendly and has no harmful components. It is designed as a fire control agent (fire lines). Sallen Seguridad is in charge of the fittings and maintenance of our products. Proytecса has a clear innovative and adapting vocation aimed to our customers' needs, which means we offer customized products according to our customers' demands. For instance, our robot was developed in close collaboration with experts at robotics, besides its basic operation, it is manufactured according the specific needs of every entity, adding specific elements required by the client. Indra has requested developments in different fields, such as electronic safes, fire gun simulators, perimeter fences, soldier robots, etc.

Material Resources:

- On the whole, our three companies have a vehicle fleet of 20 vehicles (cars, vans and trucks), 2 for factory tasks and 2 service elevators.
- We are equipped with 3 machining centres, 1 CNC lathe as a relieving machine.
- We own two industrial bays, one located in Binéfar (Huesca) Spain and another one in Torrejón de Ardoz (Madrid) Spain plus the facilities in Melilla.

Human Resources:

We employ around 120 workers, depending on the period of the year, 9 of those employees perform managing tasks, 22 of them perform administrative tasks, 9 are engineers in mechanics and electronics and the rest of the staff perform different specialized tasks in the manufacturing and assembly processes.

Year of establishment: 2001

Future projects:

Our future projects include a wider internationalization of our products, consolidating the work of our International Department, and the exclusive devotion to the external promotion of our products.

In relation to the development of new products, we are ready to launch Proybot (a new model of deactivating robots of a smaller size), new models of access entrance gates and, of course, any innovation according to the specific needs of our customers.

AFICHE VISUAL, S.L.

Activities:

- 2790 - Manufacturing of other materials and electrical equipment (ILLUMINATED SIGNS AND BANNERS)
- 1812 - Other printing and graphic activities (LARGE FORMAT DIGITAL PRINTING)?
- 1820 - Reproduction of printed signs and banners (VINYL BANNERS AND SIGNS)

Description of their activities:

We are creative company devoted to graphic services, large format digital printing, exhibitors and audiovisual communication. Though the company was established in 2008, we have a large experience with more than 40 years working in this sector: vehicle wraps and graphics, banners, inner and outer signalling, signs, displays, exhibitors, acid vinyl for glass decoration, illuminated signs and banners, light boxes, pole signs, pennants, advertising exhibitors, corporate letters, corporate image design and logotype design.

We offer a wide range of products and services related to advertising, exhibitions, design and decoration.

Material Resources:

We apply the latest technology available, in order to develop any signage project, exhibitors, or visual communication project.

Our equipment consists of:

- 1 industrial bay (300 m2) for manufacturing tasks.
- 1 Renault Traffic van for our working team
- 1 large format digital plotter
- 1 Vinyl cutting plotter.
- 1 Laminator with mounting desk
- 1 equipment for sign and banner mounting
- 1 cutting and milling machine for plastics, wood, methacrylate and aluminium, etc.

Human Resources:

- Training and a long experience in sign and banner printing and installation, LED illumination technology and signing, vinyl mounting, embossed letters, etc.
- Graphic Design Master's Degree.

Year of establishment: 2008

REMEDIOS CERREZO

Asociación de empresarios de la Litera

Activities:

9499 - Other associative activities

Description of their activities:

The objective of our Association is to provide our members with a range of services in better conditions than if they were accessed individually, for example:

- To represent and defend our members' interests.
- To provide professional services, such as:
 - Training for employees, freelancers and unemployed people.
 - Recruitment services.
 - Workplace Risk Prevention, Quality-Control and Environmental Services.
 - Subvention application.
 - To inform and give advice on different topics which may be interesting to our members.

Material Resources:

Fully equipped offices: 3 computers (2 computers, 1 laptop), 2 printers (photocopier, scanner), and other office equipment. Meeting room (for 30 people).

Training Centre: 271 m2: 41 m2 as theoretical teaching room, for 18 students; 230 m2 as practical teaching rooms (workshops) equipped with tables, chairs, blackboard, 2 workshops with machinery, welding tools, (such as 10 tig-mig welding machines, electro-welding machines, arc welding machines, etc.), electricity and plumbing tools and locker room.

Human Resources:

Number of employees: 2

Training and background:

- Manager: B.A. in Law, Master's degree in Human Resources and other training background.
- Recruiting Specialist: B.A. in Psychology.

We employ experienced teachers for offering welding, electricity, and plumbing training courses.

Year of establishment: 1993

Future projects:

Our projects for the immediate future consist of providing more services to our associates (small and medium sized companies and freelancers) to promote the economic and social development in our territory.

Construcciones Lumbierres

Activities:

4521 - Construction and civil engineering.

Description of their activities:

Building construction, rehabilitation, and preservation.

Material Resources:

Concrete works and building.

- 8 small electric cement mixers.
- 1 Mtus. mortar-mixer projector
- 4 electric vibrators
- 3 Prince Bem-20 pumps
- 1200 m2 formworks
- Scaffolding for façades: European S48 (several sets)
- Formwork equipment (straining pieces, strip footings, metal sheets, steel soldiers, etc)

Pumps, compressed air machines, probes and cement foundations:

- 1 ROTAIR Mdum-35 AP air compressor
- 1 100 l compressor. 3 CV. Belts
- Compressors, electric hammers and drillers, nail guns, etc.

Earth movement:

- 1 Mustang mini retro-excavator
- 4 Dumpers
- 1 Retro excavator
- 1 chain excavator

Transport:

- 1 IVECO truck mounted crane 27m and 40 tn.
- 1 IVECO truck mounted crane 22 m and 25 tn.
- 1 IVECO truck mounted crane 14 m and 16 tn.
- 1 NISSAN dumper truck 3500 kg.

Elevation:

- 1 LIEBHERR 50 ECB tower crane
- 1 LIEBHERR 30 LC tower crane
- 1 LIEBHERR 20 H tower crane auto-mounting

- 1 Wiskehes senior Em-304 crane Senior crane column bipod
- 1 GT 10x5 freight elevator/crane
- 1 MANITOU MT 928-4 telescopic
- 1 TECNOCAR 2,5 Tn. fork-lift
- 9 vans for our team
- 6 portable office cabins
- 6 portable locker cabins (2,30 x 2,40)
- 5 portable WC cabins
- 1 diesel fuel tank (5000 l.)
- 1 Cobra 455-613 concrete cutter
- 1 Borad diamond cutter table, wood TLE3, water...
- 1 Compact piston (Rana)
- 1 Solar DS-2220 T washing system
- 2 bending and cutting machines (cross-cut saws and circular saws)
- 1 welding machine
- 10 metal containers for rubble
- 2 containers for cardboard
- 1 container for plastics and recipients
- 3 Láser lever (L-130 with sight. Pd28 Hilti, Gat-120 HV)
- Electric panelboards for construction works
- Nets, sawhorses, ladders ...etc
- Crane accessories (cabins, weighting hooks...)
- Loading platforms, gangways, handrails
- Tools, other equipment, portable machines
- Machinery accessories

- 1 main office (250 m2)

Hardware:

- 8 Computers (Pentium IV) + Screen (TFT 19")
- 1 EPSON Stylus PRO 4400 (A1) Plotter printer
- 1 HP Color Laserjet 4650 (both sides) printer
- 2 HILTI PD28 and PD42 laser measurers
- 1 Nashuatec MP2000 (Aficio. A3) multi-function equipment

Software:

- 1 Microsoft Navision* (building works management)
- 1 Presto 10.03 (4 workstations) - for quotes and building measurements

Human Resources:

Number of Employees: 40

We employ a cohesive staff with an efficient and functional organization structure, made up of administrative, technical and managing departments, site managers, first-class workers, and other operators.

In reference to the technical department, we employ:

- 3 architectural technicians, two of them with 15 years of experience, and the other with 7 years of experience in our company.
- 1 draughtsman with more than 7 years of experience in our company
- 1 first-class worker specialized in public works with 15 years of experience in our company.

PINTURAS LEPANTO S.A

Activities:

(2030) - Manufacturing of paints, varnishes, stains, printing tints and fillers.

Description of their activities:

Design and manufacturing of acrylic paints (standard and thin), eco-friendly paints, soft distempers, varnishes, enamels, primers, base coats, signalling, etc.

Material Resources:

FACILITIES:?

Our industrial bay is 9000 m2, where we perform our research and development, research, manufacturing, canning and logistics tasks by means of the latest high-tech, guaranteeing accuracy in every process. Our work is supervised by experts who guarantee the continuous quality of manufactures. Automation allows us to be competitive and to be ready for future challenges.

INDUSTRIAL BAYS

?At the Pinturas Lepanto premises, we manufacture and store our products.?Manufacturing: wide range of high-tech machinery speed up the canning process, among which we want to highlight:

- silos and tanks for raw materials storage.
- pallet jacks, canning machines and sealers for acrylic paints and enamels.
- Water filters
- Shakers, water pumps, helical mixers, hoppers and scales for manufacturing.
- Air compressors and extractors
- Mills and feeders for enamel manufacturing.

We carry out continuous checking of our needs to modernize and expand our machinery consequently, improving our productivity and adapting to the increasing competitiveness. ?Storage: 2500 m2 to store manufactured products and more than 3000 m2 to store raw materials for paint manufacturing.

LABORATORY

Our laboratory is equipped with every tools necessary for testing and quality control, besides three tintometric machines for manufacturing a wide range of colours, offering our clients the possibility of choosing among more than 10000 colours from different charts (Ral, Coltec, Nova, NCS). Equipped for research and development tasks. ?We want to highlight the following tools in our laboratory:

- espectrophotometer (quantification of the spectra) , digital scales, termometers, metros, grindometers (to measure the particle size of suspensions) , pycnometer, glossmeter.
- labeller
- ph portable ph meter (to measure ph)

- colorimeter

VEHICLE FLEET:

- 1 van.
- 1 truck of less than 3500 kg
- 7 trucks of more than 3500 kg (3 of tare up to 5000 kg and 4 of tare between 7000-9000 kg)
- 6 fork lifts for storage depots (up to 1500 kg)

Human Resources:

Number of employees:

?Training and educational background of our staff:?

Our board of directors consists of 4 M. S. in Chemistry and B.A. in Economics and 1 skilled worker.?

Our drivers are accredited by special ADR driving licenses, for the transportation of dangerous goods by road, and are well acquainted with transportation regulation. ?All the members of our staff attend regular training courses both about specific tasks, hsuc as colormetry, fork lift driving or labelling, and about general aspects, such as health and safety at work or environmental security.

Year of establishment: 1965

SILGAR, S.C.P.

Activities:

(24.33) - Metal profiles manufacturing

Description of their activities:

Metal structure manufactures, metal enclosures, boiling works, cold-storage chambers.

Material Resources:

4 heavy duty machinery, including:

- Pneumatic angle shears 3 m. long with a cutting up to 8 mm thick.
- Pneumatic Bender 5 m. long with a bending up to 10 mm. thick.
- Manual rollers 3 m. long for bending any kind of sheet metal.
- Pneumatic saw for cutting any kind of metal profiles

Our workshop is equipped with a wide range of tools and machinery (arch welders, welding wire machines, gas welding torches, deburring machines, polishing machines, electrical and manual saws, punching and flat shearing machines, etc...) We are also equipped other kind of tooling, such as drillers and so forth.?

Our vehicle fleet has 2 middle size Volkswagen transporter vans, two small size Renault express vans, a Renault crane truck 9 m. long and 3 ton., an upright lx41 fork lift (documentation in order).

Our facilities can be found at the older industrial park in Binefar, with two industrial bays: one is 900 m², where we find our premises (100 m²), and the other is where the workers' changing rooms are (50 m²), which is 600 m².

Human Resources:

Currently, we employ 12 people working in our workshop, either performing assembly tasks or driving. 2 people work in the administration department, 1 person in the engineering department and 1 person in the management department. Most of them have attended training courses on risk prevention at work, welding, etc... All necessary for the proper performance of their tasks.

We also work with other companies which help us manage our daily work, such as managing agencies, financial advisors, health and safety advisors, invoice chasers, etc.

SYP, S.C.P. Technical Department

Activities:

(7112) - Engineering advice and other activities related to technical advice.

Description of their activities:

Project development, site management, technical consultancy on building, construction and installation works.

Material Resources:

- Our premises are located in a 100 m² office.
- 4x4 vehicles to visit the work-sites.
- 8 Latest tech-computer workstations.
- 3 document printers.
- 2 Plotters for plans up to DIN A-0.
- 1 photocopier up to DIN A-3.
- 1 colour- scanner up to DIN A-3.
- 1 photocopier for plans up to DIN A-0.

Software:

Specific structural calculation software for reinforced concrete structures, metal structures, quotes and measurements, pipe networks calculation, design software: CAD/CAM/CAE, 3D modelling, mechanical calculation of high power lines, mechanical calculation of low power lines, calculation of low voltage installations, calculation of electrical networks for street lighting, calculation of low voltage distribution networks, calculation of high voltage distribution networks, calculation of high voltage substations, hydraulic networks calculation, sewage network calculation, earth electrode calculation, high-medium voltage lines design, design and calculation of electrical installations, design and calculation of urban infrastructures, safety and health projects, etc

Technical equipment:

- HILTI PD 25 laser measurer
- HIBOK-30 luxometer
- HIBOK-320 digital earth measurer
- HIBOK-56 digital amperometric clamp
- HIBOK-412 sound level meter

Human Resources:

SYP employs a team of professionals with a long experience in engineering works:

- 2 B. S. in Industrial Engineering (specialized in Electrical networks).

- 1 B. S. in Industrial Engineering (Specialized in Industrial Electricity and Electronics and graduated in Quality Accredited Systems)
- 1 B. S. in Industrial Engineering (specialized in Structures and Mechanics).
- 1 B. S. in Chemistry.
- 2 Technical Assistants - Draughtsmen.

Apart from the staff we have just mentioned, SYP's staff is integrated by the following collaborators:

- 1 architect.
- 1 M. S. in Telecommunications.
- 1 B. S. in Agricultural Engineering.
- 1 B. S. in Agricultural Engineering - Topographer.

TAHERGA LA FIGUERA S.A.

Activities:

(2410)- Boiling works

Description of their activities:

Metal structure manufactures, metal enclosures, cold-storage chambers and boiling works by accredited welders, fodder plants manufacturing, port structures with gangways, etc...

Material Resources:

- Hydraulic shears, 3 m. long, cutting power: up to 15 mm. thick.
- Hydraulic bender (250 tn)
- 3 pneumatic saws for cutting any type of edges
- Large-size manual machinery (arc and electrode welding machines, refrigerated welding machines, pulse welding for stainless steel, tig-mig welding machines, gas welding torches, demoiler, sanders, manual electrical saws, punching machines, cutting machines, etc.), and small-size equipment (drills, other tools, etc...)
- Machining centre including lathes, milling machine, etc.
- Large, medium and small vans and pick ups, trailer-mounted crane (35 tn.) with 12m long dumper.
- Industrial bay, building of 5000 m2, 10m high, equipped with 8 bridge cranes, offices, locker rooms, and 20000m2 open-air storage, located 1.5 km away from our offices, heading on the main road towards Albalate de Cinca (Huesca/Spain).

Human Resources:

Currently, we employ 20 people, working as workshop operators, building site fitters, vehicle drivers and office workers in our technical department.
